

Visual Studio Code

Visual Studio Code (VSC)

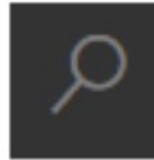

- There are a few important parts of Visual Studio Code you should familiarise yourself with.

- Important buttons:

Explorer – Like File Explorer

Search – Search in Files

Extensions – Install Extensions

VSC: Add the Python Extension

- Start up Visual Studio Code
- Click the Extensions  button
- Search for **python** and click the install button

And then Wait for it to finish *installing*

And that is it, once its done we will be able to do some python coding!
