

What Windows stuff will we be using?

Windows File Manager – to extract the zip file we will download with Microsoft Edge Browser

Microsoft Edge Browser – to download stuff and show our simple web site

Windows Notepad – to edit files

Setup

So these steps may look a bit scary for some of you, but don't worry I can help.

1) Download <https://gbc.pellcorp.com/static-sample.zip> to Downloads directory and Extract All to Downloads/static-sample directory.

2) Use Windows File Explorer to find the Downloads/static-sample/index.html and double click it to open it with Edge.

Cat Quotes Website

This cat quotes web site is very basic.

1. It has a title: **Cat Bible Quotes**
2. It has a cute cat photo
3. It has a random quote in yellow

There are 3 files static-sample.zip file you will extract:

1. The index.html is the file that Edge will first read to display the web site
2. The cat.jpg – is a cute cat picture
3. The dog.jpg – is a cute dogs picture

Exercises

1. Change the Web Page Title
2. Change the colour of the quote text (from yellow to something else)
3. Change the background colour of the web site
4. Change the background image to the dog.jpg picture.
5. Change the size of the quote text
6. Change the location (move it to the right, to the left, etc) of the quote text
7. Add some extra text to the page
8. Add the cat.jpg as a normal image (not a background image), using the ``img`` tag. You might need to ask google how to do this.
9. Change a quote
10. Add a new quote
11. Change to always return the same quote
