

## Things to Remember

- This is supposed to be fun
- There are no stupid questions – seriously there are not!
- These exercises are my idea of fun, but I am a self confessed giant nerd, so sorry if you don't also find them fun and challenging.
- If you are unsure of something, ask me or a friend, or if you are feeling adventurous ask google.

## What Windows stuff will we be using?

Windows File Manager – to extract the zip file we will download with Microsoft Edge Browser

Microsoft Edge Browser – to download stuff and show our simple web site

Windows Notepad – to edit files

# Setup

So these steps may look a bit scary for some of you, but don't worry I can help.

1) Download <https://gbc.pellcorp.com/static-sample.zip> to Downloads directory and Extract All to Downloads/static-sample directory.

2) Use Windows File Explorer to find the Downloads/static-sample/index.html and double click it to open it with Edge.

3) Open the index.html file in notepad. I will demonstrate this, as its not as easy as it should be (Bad Windows :-)

# Exercises

All of these exercises require you to open the index.html file in notepad, and make a change and refresh the web page back in the Microsoft Edge browser, I will demonstrate that for you:

1. Change the Web Page Title
2. Change the colour of the quote text (from yellow to something else)
3. Change the background colour of the web site
4. Change the background image to the dog.jpg picture.
5. Change the size of the quote text
6. Change the location (move it to the right, to the left, etc) of the quote text
7. Add some extra text to the page
8. Add the cat.jpg as a normal image (not a background image), using the `img` tag. You might need to ask google how to do this.
9. Change a quote
10. Add a new quote
11. Change to always return the same quote
